

## PRO SEEDS ALL-AMERICAN MIXTURE

Reed & Perrine's All-American Mixture combines the highest-rated tall fescue cultivars with fast-germinating perennial ryegrass cultivars to deliver high turfgrass quality and color. Utilizing NTEP-tested cultivars from Mountain View Seeds, All-American contains top-rated genetics to provide improved disease resistance, stress tolerance, color, and establishment vigor. All-American is the optimum mixture for overseeding and establishment, with excellent usage in certain golf, sports turf, and residential situations.

## FERTILIZER RECOMMENDATIONS

Reed & Perrine 18-24-12 Starter with 25% slow-release, biosolids, and 1.25% iron

The Andersons 21-22-4 + 0.08% Mesotrione with 25% slow-release and 0.50% iron

**Diamond Tag Quality** seed blends - available only from The Andersons Reed & Perrine - meet or exceed both federal and state standards for cleanliness and are guaranteed to be free of annual bluegrass, bentgrass, and coarse grasses such as orchardgrass. These seed lots also exhibit excellent germination and purity content.

**The National Turfgrass Evaluation Program (NTEP)** is designed to develop and coordinate uniform evaluation trials of turfgrass varieties and promising selections. Test results are used to determine the performance, reliability, and adaptability of a particular cultivar.

*Blends may contain alternative cultivars when/if necessary.  
Pricing and/or seed varieties are based on availability and are subject to change without notice.*
