

READ BEFORE MIXING

INDUCTOR AND TOP TANK OPENING MIXING ORDER

1

50%-66% WATER: Fill the tank with half-to-two-thirds the required water volume and begin agitation.

3

FOLTEC SG: Remove basket strainer, add required amount of Foltec SG, and continue agitation until dissolved.

2

HUMIC PRODUCTS: Add any HCU®, HCAS™, or UltraMate® SG and continue agitation until dissolved.

4

OTHER PRODUCTS: Add any remaining products and remaining water.

UAS/DRONE MIXING

- Mix enough Foltec SG to treat one acre (typically one bag) in 5 gallons of water and apply at a spray volume of 5 gallons per acre.
- Remove fine mesh basket strainers where permitted and ensure filters are clean prior to filling.
- Pre-dissolve product in a small volume of water before adding to the drone tank to ensure rapid dissolution.
- Foltec SG is fully compatible with a wide range of nozzles including rotary atomizers.
- Do not apply during temperature inversions or when wind speeds exceed local regulatory limits.

Always follow all product labels. Perform a jar test before mixing to check for clumps or settling.
