

SIMPLIFY AERIFICATION FERTILITY WITH GENESIS RX® CANADA

	TWO WEEKS PRIOR TO AERIFICATION	AERIFICATION	FOLLOWING AERIFICATION
GOOD 1 PRODUCT 1 APPLICATION			GENESIS RX® 5-7-5 15 lbs./1000 ft²
GREAT 1 PRODUCT 2 APPLICATIONS	GENESIS RX® 5-7-5 7.5 lbs./1000 ft²		GENESIS RX® 5-7-5 7.5 lbs./1000 ft²

Applying fertilizer before, during and after mechanical aerification all provide unique options for ensuring your turf recovers quickly. Genesis Rx 5-7-5 represents the most comprehensive fertilizer we have ever produced, offering a single-product solution designed to simplify aerification fertility and accelerate turfgrass recovery.

WHAT'S IN THE BAG?

Genesis Rx 5-7-5 is a high-quality NPK fertility blend containing secondary and minor elements and utilizing our patented Dispersing Granule (DG) Technology. This unmatched combination provides turfgrass with the nutrition needed for recovery from aerification stress, along with sustained feeding. We further value engineered this product by adding 21.5% Humic DG™ (by weight) in the bag to deliver soil microorganisms the carbon-rich food source they desire.

TURFGRASS RESPONSE TO
2 APPLICATIONS OF GENESIS RX® 5-7-5

In this example, 7.5 lbs of Genesis Rx 5-7-5 were applied at Week 1 and then another 7.5 lbs were applied at Week 3.
