

AERO-Blitz®

Aero-Blitz® is a specialized micronutrient blend specifically designed for aerial application via drones, airplanes, and helicopters on row and field crops. This blend of micronutrients is designed to help mitigate midseason stress to help boost yields at harvest.

FEATURES & BENEFITS

- **Specifically designed for foliar application with drone and aerial application technology**
- **Great for all crops**
- **Delivers nutrients when crops need them most, especially aiding in the relief of plant stress**
- **Built to optimize reproductive growth in most crops**
- **Formulated to be used as part of a tank mix with other crop protection products, reducing the number of passes needed in the field**

FREQUENTLY ASKED QUESTIONS

Q: What is the benefit of drone and aerial application methods for fertilizer applications?

A: Using aerial fertilizer applications increase efficiency by covering large cropping areas quickly and precisely. Drones also minimize waste by delivering fertilizer where it is required without the need of traditional foliar application methods.

Q: How does applying Aero-Blitz with aerial applications save time and money?

A: Fertilizer application with a drone can save time by quickly applying products to fields. Drone applications allow fertilizer use rates to be lowered by customizing applications through the field to where the nutrients are needed most.

Q: When should I apply Aero-Blitz?

A: On field, row, and vegetable crops apply Aero-Blitz post emergence at the vegetative growth stages.

Q: What is the use rate for Aero-Blitz?

A: Aero-Blitz is applied at a rate of 16-32 oz per acre.

Q: Can variable rate be used to apply Aero-Blitz?

A: Yes. When applied with aerial applications, variable rate technology can be utilized to create a custom application plan that allows for fertilizer application rates to be adjusted throughout the field to accommodate the various nutrition needs.

Q: Can Aero-Blitz be mixed with crop protection products?

A: Yes, Aero-Blitz is compatible with many crop protection products. The Andersons recommends a compatibility (jar) test before field mixing and application. Always read and follow all individual product labels before use. For more information, visit AndersonsPlantNutrient.com/Tank-Mix.

Q: How does Aero-Blitz relieve plant stress?

A: Aero-Blitz efficiently delivers essential nutrients to crops during critical growth stages. These nutrients relieve plant stress by allowing crops to focus their energy on reproduction, improving yields at harvest.

GUARANTEED ANALYSIS

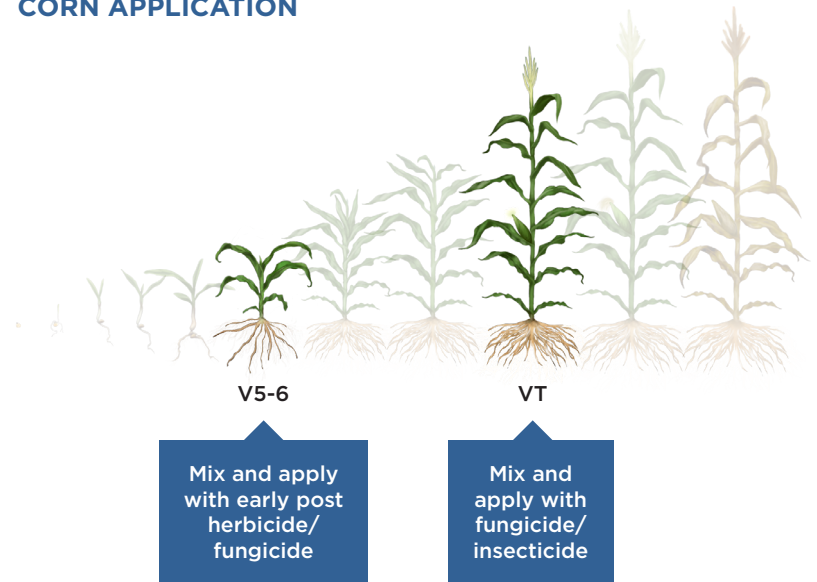

Total Nitrogen (N).....11.0%
 1.9%....Ammonia Nitrogen
 8.9%....Urea Nitrogen
 0.2%....Other Nitrogen
 Available Phosphate (P₂O₅)7.0%
 Soluble Potash (K₂O).....4.0%
