

INSECTICIDES

15-0-4 + 0.2% GRUBOUT®

- Controls early nymph stages of mole crickets
- Ideal for white grub control
- Contains essential plant nutrients to feed while preventing damage in one pass

PRODUCT CODE 10003512

PRODUCT USES Broadcast applications on golf courses, sports fields, residential lawns, commercial lawns, ornamentals and sod farms

APPLICATION 3.0-4.5 lbs/1000 sq ft

PACKAGING 50-lb bags; 40 bags/pallet

GUARANTEED ANALYSIS

Total Nitrogen (N)..... 15.00%
 15.00%.....Urea Nitrogen*
 Soluble Potash (K₂O).....4.00%

Derived from urea and potassium chloride.

Chlorine (Cl) Max 3.40%
 *3.75% Nitrogen Stabilized with N-(N- BUTYL)
 thiophosphoric triamide and dicyandiamide

ACTIVE INGREDIENT

Imidacloprid† 0.20%

OTHER INGREDIENTS 99.80%
 Total..... 100.00%

†CAS No. 138261-41-3

GRUBOUT PRODUCT LINE OVERVIEW

Product	Active Ingredient	SGN	Curative or Preventative	Feature	Nitrogen Source
GrubOut DG	0.2% Imidacloprid	Fairway	Preventative	Targets white grubs on DG Pro dispersible carrier	-
15-0-4 Grubout	0.2% Imidacloprid	Standard	Preventative	Targets white grubs	25% Fortify-N*
21-0-4 GrubOut	0.2% Imidacloprid	Standard	Preventative	Targets white grubs	50% Fortify-N*
0-0-7 GrubOut	0.2% Imidacloprid	Standard	Preventative	Targets white grubs	-
17-0-3 GrubOut Plus	0.2% Imidacloprid 0.04 % Lambda-cyhalothrin	Standard	Curative and Preventative	Prevents grubs while controlling surface insects with a quick knockdown	50% Fortify-N*
21-0-5 GrubOut XL	0.067% Chlorantraniliprole	Standard	Preventative and Early Curative	Longer residual, reduced-risk to pollinators	50% NS-54**
16-0-6 GrubOutXL	0.067% Chlorantraniliprole	Standard	Preventative and Early Curative	Longer residual, reduced-risk to pollinators	50% Fortify-N*
18-0-12 GrubOut XL	0.067% Chlorantraniliprole	Fairway	Preventative and Early Curative	Longer residual, reduced-risk to pollinators	80% MUTech***

*Fortify-N uses dual nitrogen stabilizers to improve nitrogen efficiency and reduce losses from volatilization, leaching, and denitrification, providing a consistent 5-7 week release.

**NS-54 is a polymer- and sulfur-coated nitrogen source with an advanced coating that delivers a higher nitrogen content than traditional PCSCU and a reliable 5-7 week release.

***MUTech releases nutrients based on environmental conditions, minimizing leaching and burn risk with a low salt index, while offering an extended 20-week release.
