

Foltec LQ PRODUCT USE GUIDE

The Foltec LQ line of products includes two distinct product groups. While the **FOLTEC LQ ULTRA** products include value-added ingredients like amino acids, sea plant extracts, phosphites, and micronutrients for premium turfgrass, the **FOLTEC LQ CLASSICS** products deliver time-proven formulations for a variety of applications.

*Refer to product labels for dilution information, application rates by turf type, and number of recommended applications per season.

FOLTEC LQ CLASSIC

This professional grade line of liquid fertilizers contains several time proven formulations in its lineup. Foltec LQ Classics provide a complete foliar feeding and can be used in a variety of different green settings including: lawn care, sports turf, nursery, and specialty crops.

FOLTEC LQ ULTRA

Foltec LQ Ultra is a foliar-feeding nutritional line derived from the highest-quality ingredients intended for use on premium cut turfgrass. Foltec LQ Ultra formulations are designed to boost pre-stress conditioning and improve overall nutrient efficiency. Select formulations contain value added ingredients including amino acids, sea plant extracts, phosphites, and micronutrients.

Product recommendations may vary due to geography, turf or soil health, and specific management goals. Consult your Territory Manager from The Andersons with any questions. Always read and follow label directions.
