Foltec SG 8-0-24 & Foltec SG 8-24-8 10006232 / 10006167 Tank mixed, 1 bag each per acre				Every 2 weeks								

CONTEC DG®

Contec DG combines premium turf nutrients and The Andersons' patented Dispersing Granule Technology into a homogenous granule designed to optimize granular applied turf nutrition. Upon contact with water, each granule disperses into thousands of micro particles that quickly move through the turf canopy into the root zone. Contec DG requires less watering to disperse the nutrient granules, allowing for less downtime and a drier and firmer playing surface.

**This program is intended to serve as an example and may vary due to geography and specific management goals. Please consult the TNT or your Territory Manager from The Andersons with any questions.*

FOLTEC® SG

Foltec SG is an innovative foliar nutrient technology utilizing a proprietary combination of dry, 100% soluble nutrient granules that quickly solubilize in the spray tank. Each Foltec SG product contains a specific N-P-K ratio along with essential micronutrients, UltraMate® SG (humate/carbon) and sea plant extract. Packaged in resealable foil-lined bags with easy-open tear strips to save time and effort, Foltec SG truly allows you to spray smarter.
