PREMIUM ALL-NATURAL WEED CONTROL

# GRASS GUARD® DG

9-0-0

Grass Guard DG is an all-natural corn gluten weed control. It prevents crabgrass and other weeds from germinating while also feeding your lawn. Utilizing patented Dispersing Granule (DG) Technology, Grass Guard DG suppresses weeds with lower use rates than other corn gluten meal products. Grass Guard DG does not contain any animal ingredients, manure, biosolids or wastewater by-products.

## DIRECTIONS FOR USE

Apply first in early spring before weeds germinate and again in fall, both at the high preventative rates. Weed control is related to the application rate and weather conditions. Any weeds present at application will not be controlled. Apply to dry turf using a broadcast spreader at suggested rates below and water in with 0.1-0.2" within 1-2 days. Apply up to 4 times per year at the high rate.

Weeds controlled (pre-emergent only): crabgrass, foxtail, dandelion, barnyardgrass, goosegrass.

**DO NOT USE AT SEEDING.** After seeding, wait 45 days to apply Grass Guard DG. Do not apply for 60-90 days before seeding (rate dependent).

## APPLY PRODUCT

This product should always be applied with a properly-calibrated handheld, rotary or drop-type fertilizer spreader. For even application, be sure to walk at a steady rate, slightly overlapping each pass. For best weed control results, water in with 0.1-0.2" of water.

## WHAT'S NEXT?

Get back to enjoying your lawn! But first, return any unused material back into the original package and sweep any material from driveways and walkways into your lawn. Good news! Children and pets may re-enter immediately following application.
