

PRO SEEDS BOOST MIXTURE

DIAMOND
QUALITY

Reed & Perrine's Boost Mixture combines the highest-rated cultivars from four different turfgrass species for a mixture that is applicable to many use situations. Utilizing NTEP-tested cultivars from Mountain View Seeds, Boost contains top-rated genetics to provide improved disease resistance, stress tolerance, color, and establishment vigor. Boost is the optimum mixture for overseeding and establishment, with excellent usage in certain golf, and residential situations.

NTEP TESTED PERENNIAL RYEGRASS

45%

Winter leaf spot resistance
Improved growth in cooler temps
Improved leaf texture
Dark green color

NTEP TESTED CHEWINGS FESCUE

30%

Excellent turf quality
Improved disease resistance
Shade application
A-LIST cultivar

KENTUCKY BLUEGRASS

15%

Excellent turf quality
Early spring greenup
Improved disease resistance
Improved texture

NTEP TESTED CREEPING RED FESCUE

10%

Excellent turf quality
Improved disease resistance
Shade application
Wear tolerant

FERTILIZER RECOMMENDATIONS

Reed & Perrine 18-24-12 Starter with 25% slow-release, biosolids, and 1.25% iron

The Andersons 21-22-4 + 0.08% Mesotrione with 25% slow-release and 0.50% iron

Diamond Tag Quality seed blends - available only from The Andersons Reed & Perrine - meet or exceed both federal and state standards for cleanliness and are guaranteed to be free of annual bluegrass, bentgrass, and coarse grasses such as orchardgrass. These seed lots also exhibit excellent germination and purity content.

The National Turfgrass Evaluation Program (NTEP) is designed to develop and coordinate uniform evaluation trials of turfgrass varieties and promising selections. Test results are used to determine the performance, reliability, and adaptability of a particular cultivar.

*Blends may contain alternative cultivars when/if necessary.
Pricing and/or seed varieties are based on availability and are subject to change without notice.*
