

# AERO-Set™

Aero-Set™ is a specialized blend of macro and micronutrients designed for aerial applications via drones, airplanes, and helicopters on row and field crops. The unique blend of macro and micronutrients in Aero-Set is designed to help meet the needs of the crop during critical growth stages to maximize vegetative growth and improve overall plant health.

## FEATURES & BENEFITS

- **Specifically designed for foliar application with drone and aerial application technology**
- **Great for all crops**
- **Delivers nutrients when crops need them most**
- **Built to optimize crop growth and grain quality in most crops**
- **Formulated to be used as part of a tank mix with other crop protection products, reducing the number of passes needed in the field**

## FREQUENTLY ASKED QUESTIONS

- Q: What is the value of the nutrient blend in Aero-Set?**  
A: Developed with an understanding of crop nutrient needs throughout the growing season, Aero-Set is focused on delivering essential nutrition to support vegetative and reproductive growth. The application of Aero-Set will efficiently deliver nutrients to support root growth, energy production, development of reproductive growth structures, and crop quality.
- Q: What is the benefit of drone and aerial application methods for fertilizer applications?**  
A: Using aerial fertilizer applications increase efficiency by covering large cropping areas quickly and precisely. Drones also minimize waste by delivering fertilizer where it is required without the need of traditional foliar application methods.

**Q: How does applying Aero-Set with aerial applications save time and money?**

A: Fertilizer application via drone, airplane, or helicopter can save time by quickly applying products to fields. Drone applications allow fertilizer use rates to be lowered by customizing applications through the field to where the nutrients are needed most.

**Q: When should I apply Aero-Set?**

A: On field, row, and vegetable crops apply Aero-Set post emergence at the vegetative or reproductive growth stages.

**Q: What is the use rate for Aero-Set?**

A: Aero-Set is applied at a rate of 16-32 oz per acre.

**Q: Can variable rate be used to apply Aero-Set?**

A: Yes. When applied with aerial applications, variable rate technology can be utilized to create a custom application plan that allows for fertilizer application rates to be adjusted throughout the field to accommodate the various nutrition needs.

**Q: Can Aero-Set be mixed with crop protection products?**

A: Yes, Aero-Set is compatible with many crop protection products. The Andersons recommends a compatibility (jar) test before field mixing and application. Always read and follow all individual product labels before use. For more information, visit [AndersonsPlantNutrient.com/TankMix](http://AndersonsPlantNutrient.com/TankMix).

### GUARANTEED ANALYSIS

Total Nitrogen (N)..... 5.0%  
 1.35%...Ammonia Nitrogen  
 2.88%...Urea Nitrogen  
 0.77%...Other Nitrogen  
 Available Phosphate (P<sub>2</sub>O<sub>5</sub>) ..... 3.0%  
 Soluble Potash (K<sub>2</sub>O)..... 3.0%  
 Boron (B)..... 0.5%  
 Zinc (Zn)..... 2.0%

**Derived from:** Urea, aqua ammonia, phosphoric acid, potassium hydroxide, boric acid, zinc EDTA

### PHYSICAL PROPERTIES

pH.....7.99  
 Specific Gravity..... 1.20 @ 68°F  
 Density .....9.6 lbs/gal  
 Salt Out..... 26°F

## CORN APPLICATION

## SOYBEAN APPLICATION

	Application	Use Rate (per acre)	Timing
Field & row crops	Foliar	1-2 quarts	Add to fertigation/ pesticide program
Vegetables	Foliar	1-2 quarts	
Tree & bramble fruit	Foliar	2-4 quarts	

Visit [AndersonsPlantNutrient.com/Tank-Mix](http://AndersonsPlantNutrient.com/Tank-Mix) to view approved products for tank mixing with specific herbicides.
