

AERO-Mino[®]

Aero-Mino[®] is an aerial application solution specifically designed to help boost crop health during stressful growth stages. Aero-Mino provides crops with energy from amino acids and sugar to improve overall crop growth and development and provides crops with an additional energy source.

FEATURES & BENEFITS

- **Specifically designed for foliar application with drone and aerial application technology**
- **Great for all crops to improve nutrient absorption and promote growth**
- **Delivers nutrients when crops need them most, especially aiding in the relief of plant stress**
- **Aids in the relief of plant stress during reproductive growth stages to boost yields at harvest**
- **Formulated to be used as part of a tank mix with other crop protection products, reducing the number of passes needed in the field**

FREQUENTLY ASKED QUESTIONS

Q: What is the benefit of drone and aerial application methods for fertilizer applications?

A: Using aerial fertilizer applications increase efficiency by covering large cropping areas quickly and precisely. Drones also minimize waste by delivering fertilizer where it is required without the need of traditional foliar application methods.

Q: How does applying Aero-Mino with aerial applications save time and money?

A: Fertilizer application with a drone can save time by quickly applying products to fields. Drone applications allow fertilizer use to be lowered by customizing applications through the field to where the nutrients are needed

Q: When should I apply Aero-Mino?

A: Aero-Mino can be applied as a foliar application during the vegetative and reproductive growth stages to optimize plant health.

Q: Can variable rate be used to apply Aero-Mino?

A: Yes. When applied with aerial applications, variable rate technology can be utilized to create a custom application plan that allows for fertilizer application rates to be adjusted throughout the field to accommodate the various nutrition needs.

Q: How do amino acids combat crop stress?

A: Once absorbed into the plant, amino acids increase the plant's metabolic functions. This means crops mature quicker and are able to recover from stressors quicker, lessening the overall impact on the crop..

Q: Can Aero-Mino be mixed with crop protection products?

A: Yes, Aero-Mino is compatible with many crop protection products. The Andersons recommends a compatibility (jar) test before field mixing and application. Always read and follow all individual product labels before use. For more information, visit AndersonsPlantNutrient.com/Tank-Mix.

GUARANTEED ANALYSIS

Total Nitrogen (N)..... 8.0%
 3.2%....Urea Nitrogen
 4.8%....Other Nitrogen

Derived from: urea, amino acid

PHYSICAL PROPERTIES

pH..... 7.0-8.0
 Specific Gravity.....1.27 @ 68°F
 Density10.1 lbs/gal
 Salt Out.....8°F

CORN APPLICATION

SOYBEAN APPLICATION

	Application	Use Rate (per acre)	Timing
Field & row crops; vegetable crops; soft & tree fruit	Foliar	16-32 oz	Post emergence

Visit AndersonsPlantNutrient.com/Tank-Mix to view approved products for tank mixing with specific herbicides.
