

Friday, July 10th — 5728 Sebring Warner Rd. Greenville, OH 45331

10:00 AM
Safety 101
Presented by
AES Ohio

Experience a powerful, interactive presentation that brings electrical safety to life. Using scaled-down utility equipment, experienced utility workers demonstrate how electricity is generated, how to use it safely, and the dangers of improper use. Through realistic simulations, engaging visuals, and practical safety tips, audiences learn how to recognize electrical hazards and protect themselves and others. The presentation encourages questions and discussion, making it an informative and memorable learning experience for all ages.

11:00 AM
Distracted &
Teen Driving
Presented by
Ohio Traffic Safety
Office of the Ohio
Department of
Public Safety

Learn how the Ohio Traffic Safety Office (OTSO) works to save lives by promoting safe driving behaviors and supporting traffic safety programs across the state through their mission and training. This engaging presentation will focus on the dangers of distracted driving and the unique challenges facing teen drivers, providing practical information and strategies to help keep Ohio's roads safer for everyone.

11:45 AM
Lunch

Presented by Darke County Cattleman's Association

1:00 PM
Best Lessons
about Safety
and Technology
Presented by 4B

Gain practical insights into combustible dust hazards and workplace safety best practices. This session will help attendees better understand risk identification, compliance considerations, ignition prevention, and effective dust management strategies. Through real-world examples and lessons learned from past incidents, participants will learn how proper monitoring, maintenance, documentation, and safety practices can help reduce hazards and create a safer work environment.
