

# Contec DG<sup>®</sup>

## Dispersing Granule Technology

# 11-2-9

- Patented dispersing granule formula
- Greatly reduces mower pickup of fertilizer particles
- Contains MUtech<sup>®</sup> slow release nitrogen
- Contains 8% iron for increased green-up
- Contains humic acid

If on skin: Wash affected areas with soap and water. Seek medical attention if irritation persists. Wash contaminated clothing before reuse.  
If in the eyes: Immediately flush with water for 15-20 minutes, remove contact lenses if present and easy to do - continue rinsing. Seek medical attention.

If swallowed: Rinse mouth. DO NOT INDUCE VOMITING unless directed by a medical professional. Call POISON CONTROL and seek medical attention.

### DIRECTIONS FOR USE

Apply only to actively growing turf. Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn and sweep any product that lands on the driveway, sidewalk or street, back onto your lawn. Check with your local Cooperative Extension Agency to obtain specific information on local turf best management practices. Check with your county or city government to determine if there are local regulations for fertilizer use.

### For turf:

Watering in this product will disperse each granule into thousands of particles. This will facilitate the movement of the nutrients into the soil. This particle dispersion will also greatly reduce ball, shoe and mower pickup. Cold weather and/or cold water (lower than 45°F / 7°C) can result in slower particle dispersion.

Application to wet, close-cut golf turf may result in foliar staining, which will discolor the turf to a brown/black appearance. This will occur even if immediate irrigation or rainfall occurs. Be sure to apply this product to dry turf only.

### Greenhouse/Container Planting:

Topdress at 3.0-3.5 grams per square foot (7 lbs/M). Incorporate at 15-30 lbs per cubic yard.

### Application Rates:

LOW:	4.50 lbs/1,000 sq. ft.
MEDIUM:	7.00 lbs/1,000 sq. ft.
HIGH:	9.00 lbs/1,000 sq. ft.

### For all applications:

- Immediately after application, apply a minimum of 0.2 inches of water to disperse particles into the root zone. Due to variations in temperature and water pH, best results are achieved by splitting the irrigation into 2 applications at 10-15 minutes apart. This will allow for more thorough particle dispersion into the root zone.
- Particle color may vary from lot to lot.

**Note:** This product contains the micronutrient iron for extra greening and to help prevent iron deficiency. Iron may stain concrete and other surfaces. Misapplied product to these surfaces should be removed promptly by sweeping or blowing. DO NOT WASH OFF WITH WATER.

Use in accordance with recommendations of a qualified individual or institution, such as, but not limited to, a certified crop advisor, agronomist, university crop extension publication, or apply according to recommendations in your approved nutrient management plan.

### Storage and Use:

Store in a clean, dry place.  
Reseal opened bag by folding top down and securing.  
Use only clean, dry spreaders.  
Do not leave unused product in spreaders.
