PREMIUM ORGANIC LAWN REPAIR

PURE PATCH®

Pure Patch is an organic lawn repair. It contains four key ingredients that make repairing dead or bare patches in your lawn easy; grass seed, soil amendments, fertilizer, and mulch. The coated seed is suitable for use in areas with sun or shade. Soil amending humic acid and biochar help create ideal growing conditions and the biochar helps speed up seed germination. Newly planted areas will receive immediate and extended feeding from organic fertilizer. Mulch keeps the seed and nutrients in place while also retaining moisture. Pure Patch does not contain any animal ingredients, manure, biosolids or wastewater by-products.

Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn, and sweep any product that lands in the driveway, sidewalk, or street, back onto your lawn.

PREPARE SOIL

Remove any dead grass, leaves, twigs, or other debris. Rake the area to loosen the top layer of soil.

APPLY AND WATER

This product should be applied at approximately 1 cup per square foot where grass is desired. Keep the soil moist by watering daily, or more, until the seed sprouts and reaches 3 inches in height. When you're done, reseal the opened bag by folding the top down and securing. Store in a clean, dry place.

PLANTING APPLICATION RATES

FOR REPAIRING BARE SPOTS

BEST RESULTS

RATE: 1 cup / 1 sq ft

LARGER AREA COVERAGE

(up to 25% turf damage)

RATE: 1 lb / 15 sq ft

Coverage: Up to 180 sq ft

Traffic Stress Tolerance: Good

Seedling Emergence: 7-14 days

Drought Stress Tolerance: Good

Light Requirement: Full Sun to Medium Shade

Ideal Mowing Height: 3"

WHAT'S NEXT?

Seedlings typically take 7-14 days to emerge. Avoid traffic or mowing in newly planted areas until sprouts have reached 3 inches in height. Don't forget to water! If you're not sure how much to use, keep an eye on the mulch as it will turn lighter when watering is necessary.
